

# FM SERIES

strength and endurance

## Enjoy your choice:

Mechanical pulverisers OSA FM, extremely fast and strong, have been designed for pulverizing all the materials which derive from the demolition made in the building site and also that materials which come from the demolition of concrete structures, pillars and trellis made on the ground. They are also useful for separating reinforcing rods from concrete.

OSA FM mechanical pulverisers do not need any hydraulic installation because they use the piston pushing force of the excavator penetrating arm.

Fast, strong, powerful and solid, they guarantee excellent working results.
